

## Call for Papers

### Organized Session on “Precision Manufacturing”

#### ISCIE/ASME 2014 International Symposium on Flexible Automation (ISFA 2014)

Precision manufacturing technologies significantly impact the quality, productivity, and environmental compatibility of manufacturing processes. An organized session of “Precision Manufacturing” is planned for the 2014 International Symposium on Flexible Automation (ISFA 2014), which will take place in Aiwaji-island, Hyogo, Japan on July 14<sup>th</sup> – 16<sup>th</sup>, 2014. ISFA 2014 is sponsored by the Institute of Systems, Control and Information Engineers of Japan (ISCIE) in Japan and the American Society of Mechanical Engineers (ASME) in United States.

Topics of interest include, but are not limited to, design, manufacture, modeling, planning, optimization, control, and metrology of high precision machine tools and components. Both fundamental and applied research and development in precision manufacturing are within the scope of this session.

The deadline for submission of your contribution will be November 29<sup>th</sup>, 2014. Both short and long articles will be considered and peer reviewed.

If you are interested in this topic, please check the homepage of the ISFA2014 homepage for more details by following the link below:
